

# Insight Managed Service

for Office 365

Insight Managed Service (IMS) for Office 365 provides organisations with the most comprehensive managed support package available on the market today.

IMS is a true extension of your IT team.

## Business challenge

Office 365 has become the backbone of cloud-based productivity. More than 80 per cent of the Fortune 500 now use Office 365 and customers around the world are leveraging the convenience and efficiency that the cloud suite offers.

While there is no doubt that Office 365 represents a paradigm shift in professional productivity, to say that there are no administrative overheads would be a mistake. While Office 365 removes many of the burdens involved with traditional, on-premise solutions, the cloud platform still requires significant administrative ownership.

## Our solution

Insight Managed Service for Office 365 reduces the overheads associated with supporting Microsoft productivity tools, allowing IT teams to focus their efforts on driving the business forward.

We provide direct access to our specialist team of Office 365 professionals, within a modular service package that we customise to fit your business needs. Our proactive approach ensures that IMS support becomes an integral part of your business.

## Our service

Available in two tiers: Basic\* and Standard, the service provides you with access to the people and information needed to support your Office 365 journey. As a foundation, both service levels cover you for unlimited issues or incidents relating to the Office 365 platform. Standard level support provides enhanced coverage, including valuable 'Advisory' services to provide guidance and help to optimise your Office 365 environment and includes a broader scope of problem resolution.

\*Basic is our free service, which is only available to CSP customers

## Key benefits

- Reduces the overheads associated with supporting Microsoft productivity tools
- Direct access to Insight's specialist team of Office 365 professionals
- Option to extend and tailor the IMS for Microsoft Office 365 service using Add-On modules

## Why Insight
