

Insight FinOps accelerator service

Gaining control of your cloud spend.

Cloud transformation can provide organisations with great business value, yet many struggle to manage spend and maintain oversight of costs. To effectively manage spend in the cloud requires organisations to optimize their environments and create a cultural shift.

“FinOps is an evolving cloud financial management discipline and cultural practice that enables organisations to get maximum business value by helping engineering, finance, technology and business teams to collaborate on data-driven spending decisions.” — The FinOps foundation

Optimising existing use of cloud continues to be the top cloud initiative across all organisations, and it’s estimated that 28% of cloud spend is wasted.¹

Overcoming your challenges with FinOps

A FinOps approach will drive better stakeholder collaboration to tackle the challenges, create the visibility and governance to control your cloud spend. We help you achieve this by working to the FinOps foundation’s best practice in three structured phases.

Inform

Inform and create transparency and allocation of costs.

Optimize

Optimize resources and utilization for reduced cloud costs.

Operate

Continuous improvement and collaboration, and tracking of performance.

Outcomes

- Reduction in wasted cloud spend
- Visibility into business value of technology performance and cost
- Increased predictability of cloud spend
- Documented approach and strategy for continuous success
- Defined organizational change management strategy
