IT Stock Management Solutions

Secure your hardware upfront and we'll take care of warehousing, configuration and logistics, as and when you need it.

STOCK MANAGEMENT

We offer a range of stock management solutions to support our clients with their hardware storage requirements.

There are three core solutions:

COI
Client Owned Inventory

Purchase your hardware upfront from Insight and rather than ship, we invoice only and re-book as zero value items into stock.

CRI
Client Reserved Inventory

Devices are purchased and held for you and are invoiced at point of shipment.

CSI
Client Supplied Inventory

Devices which you already own (purchased from anywhere, not just Insight) can be sent to us for storage and management.

All types of stock management and storage services will require a short agreement between parties.

Virtual Reality & Mixed Reality Configuration

We are dedicated to being at the forefront of technology innovation and supporting our clients to digitally innovate.

To support this, Insight offers our clients a configuration service for virtual reality and mixed reality devices.

This service includes configuration and enrolment for devices including:

- Microsoft Hololens
- Meta Quest

INTEGRATION SERVICES

From hardware configuration to software imaging, our team of certified technicians are skilled in delivering these services at our **certified labs (ISO 9001, ISO14001 and ISO27001).**

Our integration services offer fast, efficient and industry leading device deployments – with the flexibility to build a bespoke programme to suit your requirements.

Benefits

- Reduce your onsite provisioning time, with plug and play solutions, direct to your users.
- Decrease deployment and rollout costs.
- Simplify multi-vendor deployments.

Devices

- Plug and play modern equipment direct to your users.
- Mobile device management.
- Asset tagging and build.
- Microsoft Autopilot White Glove Services.

Server, Storage & Networking

- Server build, RAID configuration, soak testing and associated reporting.
- Switch configuration and testing.
- Fully tailored solutions.
- ESD protected, fully air-conditioned facilities.
- Highly skilled manufacturer-accredited server engineers.

ADDITIONAL SERVICES

Cut your time to deployment and rollout costs with a streamlined approach.

Device as a Service (DaaS)

- Optimise the way you buy and manage the hardware that brings this new way of working to life.
- Insight's Device-as-a-Service solution is a modular approach that delivers an end-to-end solution that delivers pre-configured hardware, lifecycle services and repair coordination to help you optimise use of assets and IT resources. Also add optional proactive device management and get total peace of mind – all for a single monthly fee. Learn more

Flexible procurement methods

Insight has a long-standing history in helping the Public Sector meet their accounting guidelines and Framework provisions to allow for Leasing agreements, compliant to IFRS 16.

Insight can also help the Public Sector spread procurement cost over multiple financial years without the requirement for third party Leasing transactions, through Extended Supplier Payment Terms.

Clients can benefit from increased supply chain discounts associated with multi-year commitments to technology renewal, without having to pay the full upfront expense typically required to obtain these discounts. This allows clients to amortise costs over time.

Benefits

- Reduce costs and future-proof prices for long term cost certainty.
- Reduce admin associated with annually renewing. technology software & support contracts.
- Streamline contract and payment terms.

Refurbishment Services

Our refurbishment services help our clients to benefit from reusing their owned devices, ready for re-deployment and eventual recycle within their lifetime.

Our team of specialists work with many devices including:

- Laptops
- Desktops
- Tablets
- Mobile Devices
- Mixed reality and virtual reality headsets

How do we refurbish?

- All devices are thoroughly cleaned.
- Existing data is wiped from the devices.
- Devices are upgraded as required to meet your specifications e.g. additional RAM.
- We configure/image to your specification.
- Devices are held in stock for you, to call off as needed, for up to 90 days free of charge.
- Refurbished devices can be ordered in the same way as a new device.
