

# Integrated hybrid cloud solutions from Insight

Insight 

Microsoft Azure, Nutanix and Veeam

Insight's integrated hybrid cloud solutions bring together best-of-breed technologies, enabling you to gain the significant business and financial benefits of a multi-cloud world. By utilising private and public cloud technologies, our Azure, Nutanix and Veeam offering reduces data centre complexity to increase data availability, resulting in accelerated digital transformation outcomes.

Tailored to your needs, the solution ensures the hyper-availability of data, optimised on-premise data centre infrastructure, and the benefits of public cloud – all securely integrated and managed by a single platform.

An Optimised,  
Integrated, Insight  
Solution – Microsoft  
Azure, Nutanix &  
Veeam

## Business Challenge

In today's 'Cloud First' digital world, businesses expect – and need – their data to work for them harder than ever, delivering business intelligence to support key strategies, automatically anticipating need and meeting demand, and moving securely across multi-cloud infrastructures.

However, to drive real value from your data you need to be able to easily scale your IT infrastructure up and down, to eliminate the resource silos created by legacy infrastructure, and to remove data centre complexity – all of which take time, resource and, above all, specialist knowledge.

## Why Insight?

Insight will deliver a customised hybrid-cloud solution that puts *you* in control.

We have deep experience in architecting solutions, the longstanding relationship with Microsoft, Nutanix and Veeam, and the certified professionals to bring you unrivalled capability to transform your cloud and data centre strategy.

Vastly improving your time to cloud, we'll match our integrated hybrid-cloud solution to your requirements and business

expectations, and ensure that it controls risk and offers high security, resilience and availability. With our specialised skills and experience, and market-leading technologies, you'll:

- Improve efficiency and lower the cost of running business applications, increasing time to market.
- Reduce complexity in your data centre and improve performance
- Maintain total access, control and sovereignty of your data

## Our Approach

Our specialists understand your business, your workloads and the technology. We analyse your requirements, and then design, create, implement and support an integrated, tailored solution with Azure, Nutanix and Veeam at its core.

We'll give you all the information you need to make informed decisions and ensure you get the balance right between on- and off-premise solutions when selecting services for migration. We'll work with you to help you migrate in a controlled way, with minimal risks to security, cost or performance. And we'll continue to support and advise you through our managed support services and with workshops, migration and optimisation services, and much more.

## INSIGHT'S AZURE, NUTANIX & VEEAM HYBRID CLOUD SOLUTION

An expertly integrated solution delivering a true hybrid cloud experience.

Microsoft Azure	Public Cloud	<ul style="list-style-type: none"><li>• IT resources when and where you need them</li><li>• Combined PaaS and IaaS public cloud services</li></ul>
Nutanix	Hyper-Converged Infrastructure	<ul style="list-style-type: none"><li>• Automated workloads across the hybrid cloud</li><li>• Simplified management interface</li><li>• Hyper-Converged Infrastructure</li></ul>
Veeam	Data Protection, Backup and Recovery	<ul style="list-style-type: none"><li>• Hyper-availability of data and applications</li><li>• Easy migration, backup and disaster recovery</li></ul>
